nguyenquyking

Research Interests

Large and small language models, LLM-based agents, and multimodal retrieval.

Education

BS **University of Science, VNU-HCM**, Advanced Program in Computer Science — Ho Chi Minh City
- GPA: 9.45/10 · IELTS: 7.0 — Sept 2022 – Sept 2026
- Dean's List 2023 & 2024, ranked 4th and 9th in the program

Projects

Vietnamese Traffic Signs Dataset — Nov 2025
5,276 cropped traffic-sign images in 39 classes, labeled in Vietnamese and English
- Curated from street-level detection data; a LeNet baseline reaches 97.9% validation accuracy

Manga Search Engine — Nov 2024 – Jan 2025
Multimodal search over 6.7K manga images; led a 5-member team
- Combined CLIP image–caption embeddings, relevance feedback, and OCR-based dialogue search

DAISY Book Library — Nov 2024 – Aug 2025
Non-profit audiobook library for the blind community
- Built an LLM pipeline that structures Vietnamese documents for DAISY conversion

AI-powered Multiplayer Quiz System — Feb 2025 – Apr 2025
Gemini-based generation of quiz questions and answer explanations

Honors & Awards

NASA Space Apps Challenge 2025: Global Nominee, one of the top 4 teams in Vietnam

KMS Back2School Scholarship 2025: One of 21 winners from 360+ applicants

ICPC Vietnam Southern Provincial Contest 2024: One of University of Science's top teams

Vietnam National Chemistry Olympiad 2021: Bronze Medal

Experience

Masan Group, AI Developer, AI Team — Apr 2026 – present
- Built PMO Bot to manage projects across the Data division
- Built MML Bot to manage the Databricks infrastructure of Masan Meat Deli

Gameloft, C++ Game Developer Intern, Asphalt 8 Team — Apr 2025 – Oct 2025
- Built and maintained back-end, front-end, and database components of Asphalt 8

Google Developer Student Clubs – HCMUS, Core Member, Operations Team — Nov 2023 – present
- Organized and coordinated academic events, seminars, and talk shows

Full House Development Club, Teaching Assistant — Aug 2022 – Sept 2023
- Taught C++, guided students, and reviewed their assignments

Skills

Machine Learning: Deep Learning, LLMs, AI Agents, Information Retrieval, Computer Vision

Frameworks: TensorFlow/Keras, scikit-learn, Sentence-Transformers, OpenCLIP, ChromaDB

Programming: Python, C++, Java, SQL, TypeScript

Mathematics: Statistics, Calculus, Linear Algebra, Discrete Mathematics
